

**DATAWAREHOUSE COURSE**  
**PROJECT: RETAIL SALES DW**  
**PART II**

**Objective**

You had access to the CRM of the Retail company. This means the following tables can now be used to enhance the DW.

Your objective in this exercise will be to include the new information in the DW design and create the ETL process to allow the integration.

The new data available can be access on the provided excel file and is composed by the following tables:

Table 1 - Clients\_extraData - Occupation, Contact and email for customers

cliente_id	ocupationId	Contact	email
------------	-------------	---------	-------

Table 2 – occupations\_descriptions - Occupation description and job family

ocupationId	Occupation	Job Family
-------------	------------	------------
